

Change Log

2022 July Updates

- Updated readme to refer to **firmware code**. Firmware from version 5.x onwards uses new **firmware code** name e.g. **FW-ZN-LVCM**
- Simplify the tables of data for payload codes for the different models.
- Reformat Chirpstack script (white space)

2022 June Updates

- Added Status-VC payload table

2022 April Updates

- Documentation updates in readme

2022 March Updates

- Added decimal numbers to **Type** that were already shown as hexadecimal
- Removed Type **0x15** 021 - Occupied Status from documentation. Was never implemented.

2022 February Updates

- Improve readme to include details on radio packets for each enLink model
- Added error message to decoder examples

2022 January Updates

- Add Chirpstack decoder
- Add supported LoRaWAN Specs
- Minor documentation updates

2021 December - Site Created

- Created github site from existing documentation
